

IOCA Website - Backend Developer Guide

Step 1: Create the Supabase Project

1. Go to Supabase and sign in.
2. Create a New Project named IOCA-Website.
3. Save your Database Password securely.
4. Get the API keys and put them in frontend/.env:
VITE_SUPABASE_URL=your-project-url
VITE_SUPABASE_ANON_KEY=your-anon-key

Step 2: Create the Database Tables

Create tables: contacts, donations, news, events, projects, volunteers. Note: donations table now requires email, phone, and payment_method columns!

Step 3: Setup Storage Buckets for Images

1. Go to Storage.
2. Create a New Bucket named public-assets.
3. Make it Public.

Step 4: Configure Row Level Security (RLS)

Enable RLS and create policies to allow public inserts on contacts, donations, volunteers, and public reads on news, events, projects.

Step 5: Admin Authentication Setup

1. Go to Authentication > Users in Supabase.
2. Add User > Create New User.
3. Enter the admin email and password (uncheck Auto Confirm).

Step 6: Final Frontend Integration Tasks

1. frontend/src/pages/Volunteer.tsx: Import supabase and add supabase.from('volunteers').insert(...) in handleSubmit.
2. frontend/src/pages/Contact.tsx: Import supabase and add supabase.from('contacts').insert(...) in handleSubmit.
3. Verify Admin Dashboard: Go to /admin/login locally and test.
